

Media Designer (1-Year Project)

The City of Surrey's Engineering Department is a true leader in the industry with a number of high profile project and initiatives. We are looking to add an in-house Media Designer that will play a pivotal role in developing and executing web/new media strategies and plans in support of the Engineering department's corporate goals and priorities. This is a great opportunity that offers tremendous potential for growth and advancement.

Who you are and what you will be doing!

- Your experience using content management systems will be invaluable as you develop, implement, and maintain website content, design and technologies for the City of Surrey's Engineering department to ensure consistency of communications and optimal user experience.
- Your considerable knowledge of media channels, web and social media analytics and familiarity with communication principles specific to each media as you plan and execute social media and/or communication strategies to increase community engagement and awareness, and improve responsiveness and transparency with Surrey residents.
- Using your strong communication skills you will provide strategic advice to internal stakeholders within the Engineering Department on how to strengthen communication links with Surrey residents using web, new media, and/or relevant communication methods.
- Your wordsmith skills will be critical as you write media releases, public service announcements and corporate reports for Engineering Department initiatives, as required.
- The ability to develop and maintain strong working relationships at all levels is imperative. You enjoy working in a dynamic environment and thrive at meeting deadlines and adapting to change.
- You are able to think with the "big-picture" in mind and are able to deliver solutions that impact the Engineering department and organization as a whole. Using this skill you will work in collaboration with the Marketing and Communications Section to ensure approach and messaging is aligned with the City's overall strategic direction and objectives.

Applicants under consideration will have:

- Completed a diploma in a related field or supplemented by courses related to website development, maintenance, and design
- A minimum of 5 years' experience in directly related work
- Public sector experience in a similar role would be an asset
- Knowledge of municipal engineering would be an asset

To be considered, please include along with your resume a cover letter and two (2) written work samples.

What's in it for you?

A career in Municipal service is one of the best moves you'll ever make. Our benefits, commitment to work/life balance, and opportunities for continuous learning are second to none. What's more, you'll be part of a close-knit team who takes pride in their work and continuously demonstrates their passion for service excellence.

If you love working in a fast-paced, dynamic environment with great opportunities for advancement, we want to hear from you!
