

We are currently accepting applications for the position of
General Manager of Municipal Infrastructure

Full-time, Permanent

The General Manager of Municipal Infrastructure is a facilitative role that offers the right leader the opportunity to shape the physical direction of the Canmore community. Our political, social and environmental landscape creates rewarding challenges, and the opportunity to lead and inspire meaningful projects that are unique to our mountain town. Some of the current and future challenges include: restricted land use planning and development, hazard management and mitigation, aging infrastructure redevelopment, local and active transit, and affordable housing. Your goal will be to combine and direct these issues into communication and implementation plans, and then influence the prioritization and allocation of finite funding and resources; at the strategic, corporate and political levels.

Above all, this role is about Leadership, Communication and Collaboration. You are a respected advisor to council, a collaborative partner with our many external stakeholders, a mentor to your technical team and a leader who can demonstrate and inspire workplace culture and values.
