Information Technology (IT) Security Manager

Under the general direction of the IT Infrastructure & Operations Manager, the IT Security Manager oversees a team of professionals responsible for the development, implementation and maintenance of organization-wide information security, and ensuring the City's ongoing compliance with applicable legislation, security policies and standards.

As the IT Security Manager, you will be responsible for:

- Leading your team in the maintenance and development of new information security policies, procedures and standards across the City.
- Researching and guiding the implementation of leading-edge Security technologies and practices
- Initiating, facilitating and promoting activities to create information security awareness.
- Monitoring changes in local, provincial and federal regulations and accreditation standards impacting information security, and recommending policy amendments as required.
- Performing routine compliance audits and risk assessments to pre-empt, mitigate and swiftly respond to audit findings as required.

To be considered for this exciting opportunity you will have:

- A Bachelor's Degree in a directly related field.
- A minimum of five (5) years' related and relevant experience in an IT management role, including at least three (3) years in a senior-level IT security role.
- Expert knowledge of information security principles and practices including security risk assessment standards, methodologies and vulnerability assessments.
- Proven success in managing a team of professionals.
- Excellent communication skills.
- Certified Information Systems Security Professional (CISSP) designation will be considered an asset.

In joining the City of Surrey, named among the world's top 7 intelligent communities, you will take your place alongside a team who take pride in their work and demonstrate their passion for providing excellent service to our clients.
