

MANAGER UNDERGROUND UTILITIES - ENGINEERING

Victoria is a vibrant, richly diverse and sustainable city, renowned as a globally recognized tourist destination hosting over 3.5 million visitors annually and a place with an enviable quality of life for its residents. Located on the southern tip of Vancouver Island and the capital of British Columbia, Victoria is home to 83,000 people and is the economic and entertainment centre for the Capital Region's 350,000 residents.

Reporting to the Assistant Director of Engineering, the City of Victoria is searching for a Manager to effectively lead the activities of the Underground Utilities Section - planning design, project management and related programs - in support of the Engineering Department annual capital projects.

Drawing on demonstrated experience and exceptional communication skills, the ideal candidate will bring fresh innovative ideas while providing visionary leadership. You are a natural relationship builder and team player committed to fostering a culture of engagement. You are strategic and have a proven track record in supporting a skilled and talented workforce that delivers results and high quality services.

A competitive salary and comprehensive benefit package is offered. This position is excluded from union membership.

A detailed job description is available on the City's web site at www.victoria.ca/jobs.

Please submit your resume quoting competition #15/54 by **4:30pm, April 30, 2015** to the City of Victoria, Human Resources Department, 627 Pandora Avenue, Victoria, BC, V8W 1N8 or fax to 250-361-0238.

We thank all applicants for applying; however only those selected for interview will be contacted.
