Storm Drainage Engineer (2 Year Contract) (JOB # J0817-0071)

As one of Southern Ontario's fastest growing cities, with its mix of urban and rural areas, Vaughan is an in-demand place to live and work. Vaughan is considered one of Canada's most family friendly cities with a dynamic and diverse population of over 300,000. With one of the top performing economies, a growing tourism industry and an enviable portfolio of recreational and cultural venues, this is the place where you want to be.

Responsible for both establishing and reviewing the City's storm drainage and storm water management policies. Provides technical expertise, assistance and guidance with respect to water resources engineering. Supervises the review and analysis of engineering plans and reports relating to storm water management and drainage in support of master planning initiatives, development applications, capital projects and operation and maintenance requirements of storm water management facilities. Responsible for ensuring a thorough review is conducted of all development applications from a storm drainage, water quantity/ quality, erosion control and low impact development/water balance perspective, and recommends appropriate development approval conditions. Formulates reports, implementation policies and coordinates specialized studies as required. Liaises with various levels of government, regulatory agencies and the public on storm drainage and storm water management related matters.

Qualifications and experience:

- Successful completion of an undergraduate degree in Civil Engineering or suitable equivalent from an accredited university, a post-graduate degree (Master's Degree) in the field of Water Resources is considered an asset/ preferable.
- Registered as a Professional Engineer (P.Eng.) with the Association of Professional Engineers of Ontario, with a minimum of five (5) years' proven, progressive and more responsible specialized engineering experience (inclusive of EIT experience) in the field of water resources, preferably in a municipal / unionized environment.
- Excellent knowledge of water resources engineering industry standards, trends, emerging issues and applicable legislative requirements.
- Proficiency with specialized computer software applications and techniques for design and analysis work in the field of water resources engineering.
- Exceptional interpersonal, organizational and analytical skills; excellent oral and written communications skills on technical and non-technical matters. Interact courteously and effectively with the Public, Staff, Members of Council, Consultants and the Development Industry.
- Knowledge of and demonstrated ability in corporate core competencies including customer services, communication, team work, initiative/self-management and accountability, and flexibility/adaptability.
- Ability to identify issues, challenges and opportunities and propose solutions.
- Demonstrated ability to work independently and collaboratively in a team environment.
- Ability to work outside regular business hours, as required.
- Valid Ontario Class "G" driver's licence in good standing and reliable vehicle to utilize on corporate business
